

$V_{ch1} : 50 \text{ V/div}$ ,  $V_{ch2} : 0.5 \text{ V/div}$   
 $i_o = \frac{V_{ch2}}{R_o} = \frac{0.5 \text{ V/div}}{10 \text{ } \Omega} = 0.05 \text{ A/div} = 50 \text{ mA/div}$

図7: 入力電圧80Vの時の励磁電流波形

図8: 入力電圧100Vの時の励磁電流波形
